

Shah Alam

Full Stack Web Developer

+91 9580429387 | shahalamx2020@gmail.com | Mau, Uttar Pradesh, India

CAREER OBJECTIVE

Full Stack Web Developer with hands-on training in building end-to-end web and mobile applications using React JS, ASP.NET Core Web API and MySQL. Experienced in implementing secure authentication (JWT, OAuth, Firebase Google Auth) and role-based access control. Built and deployed real-world applications, including an Android app live on the Google Play Store.

EDUCATION

Gopinath P.G College

2023 – 2026

Bachelor of Science (B.Sc.)

Mau, Uttar Pradesh, India

EXPERIENCE

Full Stack Developer Trainee — Coders Academy, Mau

2025 – Present

- Developing full stack web applications using React JS on the frontend and ASP.NET Core Web API on the backend.
- Implemented secure authentication and authorization using JWT tokens and OAuth.
- Tested and documented APIs using Postman and Scalar.

PROJECTS

LoopBook | React JS · ASP.NET Core · MySQL · JWT

Live on Google Play Store

Tech Stack: React JS, Tailwind CSS, Lucide React, Framer Motion, Axios, ASP.NET Core Web API, C#, MySQL, JWT Authentication, Firebase Google Auth, Firebase Cloud Messaging, Ionic Capacitor

- Built and published a full stack mobile application with React JS on the frontend and ASP.NET Core Web API on the backend, deployed live on the Play Store.
- Used Framer Motion and Lucide React for smooth UI animations and iconography, with Axios for API communication.
- Integrated Firebase Google Auth for secure sign-in, JWT authentication for session security, and Firebase Cloud Messaging for push notifications.
- Packaged the application for Android using Ionic Capacitor.

RemindMe – Reminder Management App | React JS · ASP.NET Core · FCM

Tech Stack: React JS, Tailwind CSS, C#, ASP.NET Core Web API, Axios, Firebase Cloud Messaging, Ionic Capacitor

- Developed a cross-platform reminder application using React JS with ASP.NET Core Web API as the backend.
- Implemented reminder creation, editing, and notification features with a responsive UI using Tailwind CSS and Axios for API calls.
- Integrated Firebase Cloud Messaging for reminder notifications and packaged the app for Android using Ionic Capacitor.

Book Management System | React JS · ASP.NET Core · JWT · RBAC

Tech Stack: React JS, Tailwind CSS, ASP.NET Core Web API, C#, JWT Authentication, Role-Based Access Control

- Built a full stack book management application using React JS, Tailwind CSS, and ASP.NET Core Web API.
- Implemented role-based access control (RBAC) to manage user permissions and secure API endpoints.
- Integrated JWT-based authentication for secure user sessions.

TECHNICAL SKILLS

Languages	HTML, CSS, JavaScript, C#
Frontend	React JS, Tailwind CSS
Backend	ASP.NET Core Web API, .NET Core
Database	MySQL
Authentication & Security	JWT Token, Firebase Google Auth, Role-Based Access Control (RBAC)
Mobile	Ionic, Capacitor
Tools & Services	Firebase Cloud Messaging, Postman, Scalar, Axios

PERSONAL DETAILS

Father's Name	Nizamuddin	Date of Birth	27 January 2006
Marital Status	Single	Nationality	Indian
Languages Known	Hindi, English		

DECLARATION

I hereby declare that all the information furnished above is true and correct to the best of my knowledge and belief.
